Applicant elected the method of claims 1-6 wherein the agent for preventing ovarian cancer is progestin product with traversed in Paper No. 6. Applicant is now required to cancel the non-elected subject matter from claim 1.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the WO 98/10771 publication published on March 19, 1998 by applicant.

The instant application was filed March 21, 2000. The instant claim as amended are drawn to a method for formulating a composition for preventing epithelial ovarian for administration to a female subject . . . the WO 98/10771 publication on page 12 line 29-30 state that "progestin product in preparation of a non-contraceptive medicament for prevention of ovarian cancer in a female subjects" . . . and on page 14, lines 3-8 given routes of delivery of progestin products including oral, injectables, implant, etc. as well as vaginal creams and suppositories.

Art Unit: 1614

The instant claims read on a composition of progestin product (alone) which is taught by the prior art reference.

Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2-5 are improperly directed to the same composition, containing "progestin product". Correction is required. The term "regimen" in claim 6 fails to find basis in claims 1, 2 and 5. Correction is required,

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
